## Extended (Five) Year Adjusted Cohort Graduation Rates “ACGR” for the Class of 2021-2022

The data is based on the cohort of 2017-2018.  
The cohort of 2017-2018 is the students who entered  
high school as 9<sup>th</sup> graders in the  
Fall of 2017-2018 school year.

Assessment, Data and Accountability Management (ADAM)

03/24/2023

## What is “extended (five) year adjusted cohort graduation rate (ACGR)”?

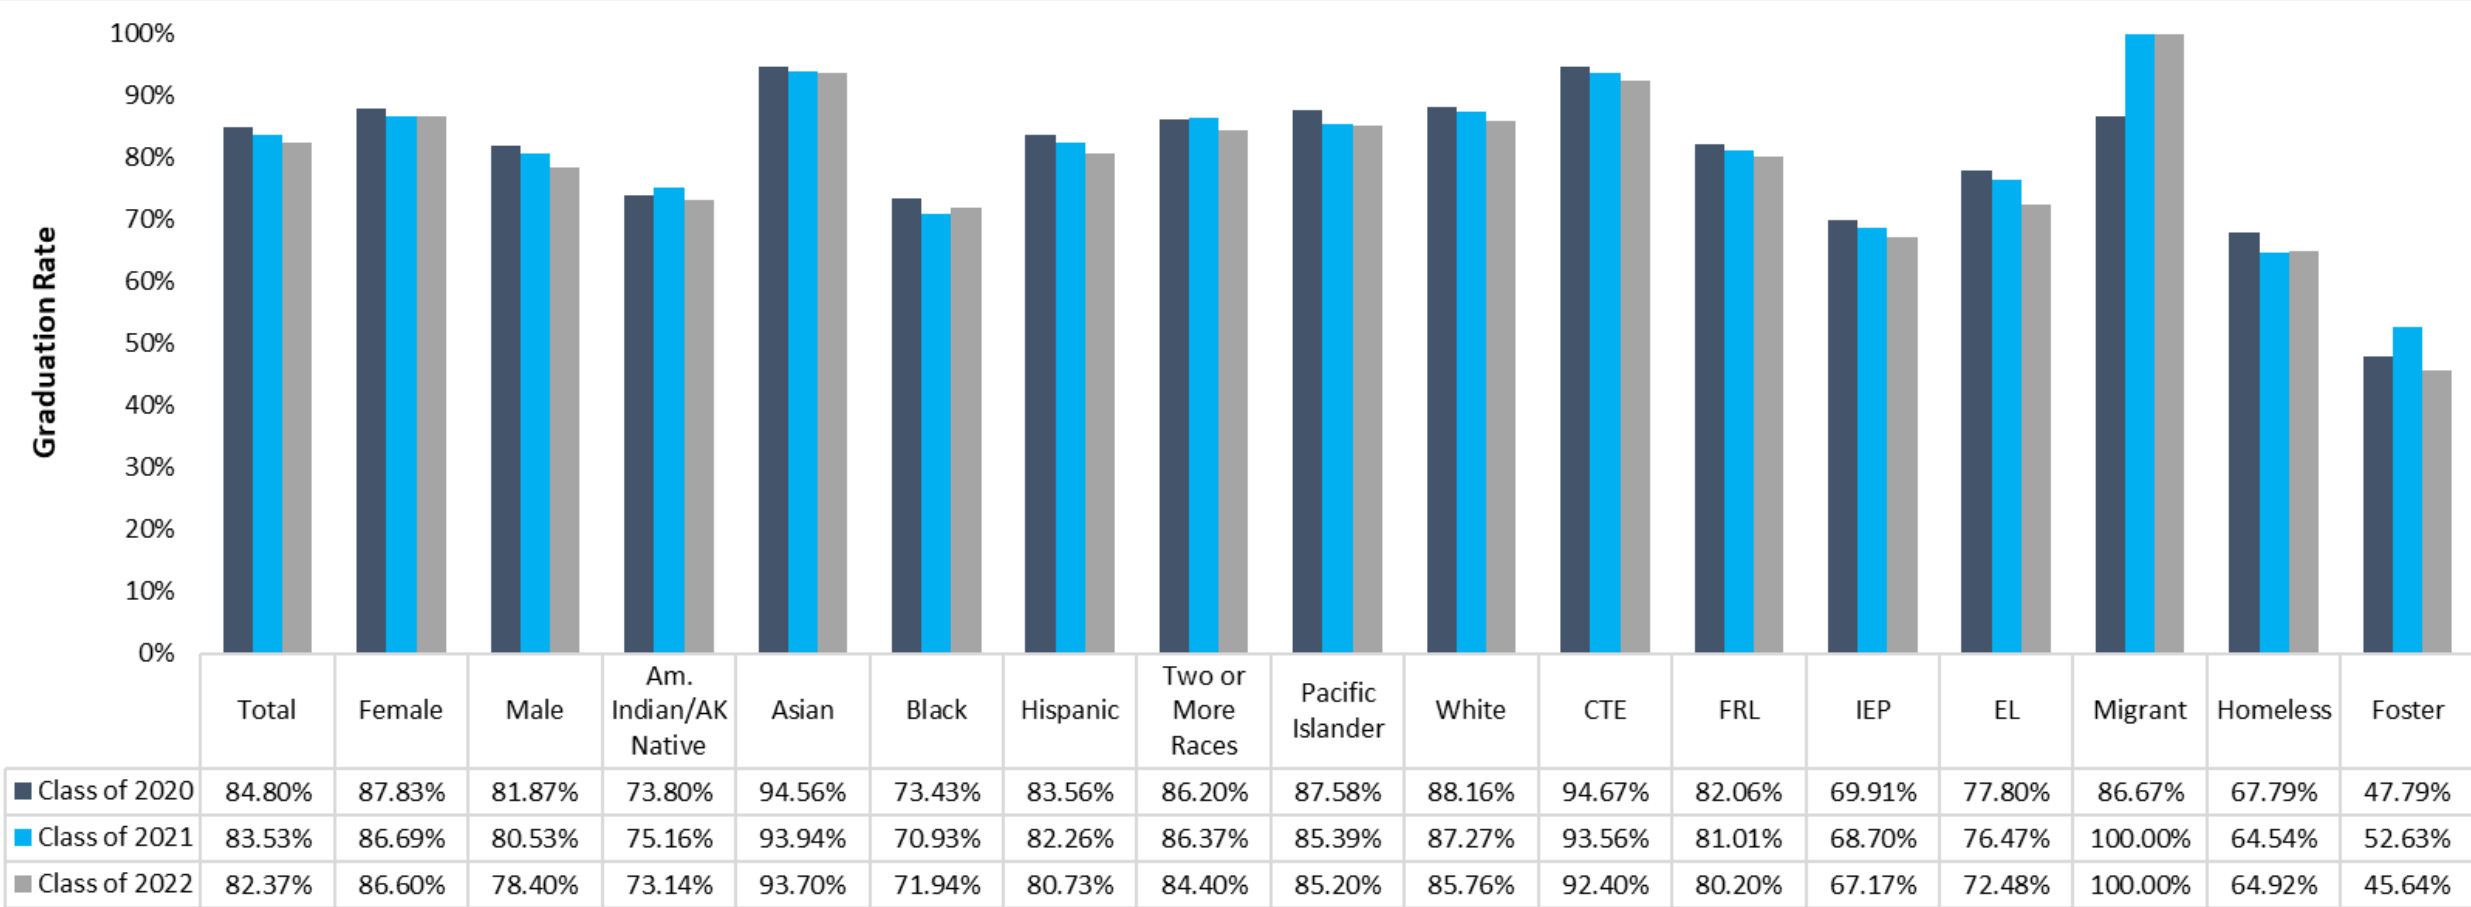

- An extended-year ACGR is calculated to include students who graduate from high school in one or more additional years beyond their cohort’s original four years in high school. For example, for a given year, a five-year ACGR is the number of students who receive a regular high school diploma five years after their cohort started in the 9<sup>th</sup> grade.
- If students take longer than four years to graduate (in this case five years), they are not included as graduates in the four-year cohort graduation rate. Instead, they are included as graduates in the extended (five) year cohort graduation rate.
- The same business rules that are applied to the four-year adjusted cohort graduation rate process are applied to the extended year cohort process. It starts with the first-time 9<sup>th</sup> graders of the 2017-2018 school year, and for the next five years, student status is tracked for graduation.
