BACKGROUND

- What is "extended year (five) graduation rate"?
 - If students take longer than four years to graduate (in this case five years), they are not included as graduates in the four year cohort graduation rate. Instead, they are included as graduates in the extended (five) year cohort graduation rate.
- Same business rules that are applied to the regulatory four year adjusted cohort graduation rate process are applied to the extended year cohort process. It starts with the first time 9th graders of the 2011-2012 school year, and for the next five years, their statuses are tracked. NDE works closely with the district staff to ensure graduation rate data are valid, accurate and agreed upon. Based on the LEA validated graduation data, NDE calculates the rates.
- 192 schools from 19 school districts were included in the graduation rate calculations.
- 56 schools from 6 school districts were excluded from the district graduation rate calculations, but included in the overall state calculations.
- Overall, 192 schools were included in the state graduation rate calculations.
